

7.2.2

TIMMS BI

BI made easy!

Easy to use, deploy, integrate and embed.
Deliver Business Intelligence to everyone in
your organization.

★★★★★ - Rated by Clients

Your business collects important data every day and you already have everything you need to report on your sales, your costs and your profits. But raw data doesn't tell you anything on its own. You need to regularly extract it, and transform it into meaningful information so you can make **proactive, strategic decisions**.

TIMMS Business Intelligence does the hard work for you. It extracts and manipulates your business data and presents you with the knowledge you need to get a **real competitive advantage**.

Benefits of TIMMS BI

- Gain insight to how your business is actually performing day-to-day and compared to previous periods;
- Jump straight into in-depth analysis with understandable and meaningful data;
- Use exceptional reporting to analyse, trouble-shoot, and determine strategic action required;
- Improve your business relationships with more relevant information about customers;
- Get the right knowledge to the right people, at the right time;
- Produce information according to your business schedule means your information flows at the right time;
- Use a scalable infrastructure that will cater for your business growth.

TIMMS BI delivers world-class reporting & analytics features

Easy to use

TIMMS BI is a single-integrated 100% web-based application. Anyone comfortable using a web-browser can easily learn to take full advantage of TIMMS BI's broad range of world-class BI features.

Smart dashboard & KPIs

Personalized and integrative dashboards allow your business to enhance organizational visibility and effectively align actions with strategy.

Track the status of your business via tailored, scheduled KPI reports, assign goals, collaborate and share knowledge.

Collaborative BI

TIMMS Collaborative BI features provide a mechanism for you to share and discuss your business data, leading to faster and smarter decision-making.

Share knowledge and content. TIMMS BI Connect – a YouTube style embeddable widget – enables BI content to be shared on any Webbased platform.

Discuss and overlay knowledge on business data, create threaded discussions and annotate reports to facilitate unified decision-making. Collectively decide the best course of action, and transform discussion into action with voting and polling widgets.

Fast to deploy

TIMMS BI's mission is to build highly intuitive software that is fast to deploy, easy to be integrated and embedded. TIMMS BI provides you with a comprehensive BI solution for your entire enterprise, offering superior ROI through widespread end-user adoption.

Location Intelligence

TIMMS BI provides you with layered maps, enabling deep analytical insight. Effortlessly merge your spatial and regular data in a wide variety of mapping formats.

More than 70% of your data has a location component. Understanding the 'where', not just the 'what' and 'when', of your business is critical.

Mobile BI

TIMMS BI is making Mobile BI easy on any device or platform, via native applications for the iPhone, iPad and Android devices as well as browser based delivery.

Access business critical information wherever you are and whenever you need it. TIMMS Mobile BI solution is device independent. Any content created via TIMMS BI on the web is instantly accessible via the mobile device of your choice.

This means less training, less re-work and less administration; saving you time and money – just connect and go!
