TIMMS
eCommerce

eCommerce made easy!

TIMMS eCommerce enables B2B / B2C translator that provides you with everything you need for EDI integration.

★★★★★ - Rated by Clients

TIMMS eCommerce creates a secure channel to electronically exchange sales and purchasing documentation. It links you to your customers, your suppliers and other trading partners you have. By electronically sending and receiving documents like purchase orders, invoices and delivery dockets, you don't have to waste time re-keying information or printing and posting.

eCommerce gives you a secure way to do business over the internet. It enables you to strengthen your business relationships and give you more time to concentrate on business growth.

Connect to your online store, automate and increase sales without increasing headcount.

Benefits of TIMMS eCommerce

- Exchanging documents electronically will give you massive costs efficiency giving you lower transaction costs to take and process orders;

- Increased accuracy without data re-keying and document translation errors;

- Faster processing time with automatic generation of documentation, bringing shorter delivery cycles and enhanced customer service;

- Improved trading cycle due to faster ordering to payment cycles;

- The potential to reach a wider customer base and earn greater revenue;

- Improved relationships with trading partners and customers as well as a strong competitive advantage.

" *Best eCommerce platform, **easy to use** and **very functional**......*

TIMMS eCommerce delivers the best B2B/B2C integration features

🔒 Security, Efficiency & Control

eCommerce gives you a secure way to do business over the internet. Automate receiving purchase orders and sending invoices with time saving benefits , increased accuracy and productivity.

TIMMS eCommerce creates a secure channel to electronically exchange sales and purchasing documentation.

👥 Unlimited Trading Partners

There is no limit to the number of connections to customers, suppliers and trading partners which means that your business isn't restricted.

🛒 Stock Matching

You can match stock receipts to purchase orders and receive warnings if the price differs between them which means that your costs are always known.

🔄 Automatic Translation

Setup the automatic translation of supplier and customer products codes and Units of Measure to match your own codes to speed up processing time.

📄 Document Integration

Industry, National and International standard document format, so you don't have to worry about translating data.

🔗 Connectivity

Link to external software packages and instantly upload quotes into TIMMS.
